Fahim Fardin

Software Developer | Python | Full-Stack Development | Data & Machine Learning

Dhaka, Bangladesh | +880 1726-490209 | fahimfardin1045@gmail.com
LinkedIn | GitHub | Portfolio

Professional Summary

Software Engineering graduate with hands-on experience building full-stack web applications using Python, Django, Flask, Java, Spring Boot, PHP, and SQL. Developed projects in e-commerce, inventory management, restaurant POS, hospital appointments, hotel booking, and content management. Currently supports AI and machine-learning workflows through image research and data annotation at ARC Annotation. Skilled in relational database design, CRUD operations, authentication, form validation, responsive interfaces, and data quality.

Technical Skills

Programming: Python, Java, PHP, C, SQL, HTML5, CSS3, JavaScript

Frameworks and Libraries: Django, Flask, Spring Boot, Spring MVC, Spring Security, Spring Data JPA/Hibernate, Flask-SQLAlchemy, Thymeleaf, Jinja2, Bootstrap

Databases and Data Analysis: MySQL, SQLite, PDO, PyMySQL, Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, TensorFlow, Jupyter Notebook, Statistics

Tools and Practices: Git/GitHub, Maven, VS Code, MS Excel, CRUD operations, relational data modelling, authentication and authorization, form validation, responsive UI development, automated testing, data annotation, quality assurance

Education

Professional Master's in Information Technology (PMIT) – Jahangirnagar University — 2026 – Present
CGPA: Ongoing

B.Sc. in Software Engineering – Daffodil International University — Jan 2022 – Dec 2026
CGPA: 3.78

Higher Secondary Certificate (Science) – BCIC College, Mirpur-1, Dhaka — 2020
GPA: 5.00

Secondary School Certificate (Science) – Monipur High School & College, Mirpur-2, Dhaka — 2018
GPA: 4.89

Professional Experience

Data Labeler – ARC Annotation — Jan 2026 – Present
Remote | Toronto, Ontario

- Conduct image research and annotate visual data for AI and machine-learning projects according to task-specific guidelines.
- Maintain annotation accuracy, consistency, and quality through careful review and attention to detail.

Projects

FreshBasket Fruits — GitHub
Python, Django 5.2, MySQL, JavaScript

- Developed an e-commerce and inventory application featuring product search, filtering, cart, voucher validation, checkout, guest order tracking, staff dashboards, purchasing, stock control, and spoilage management.
- Implemented transactional order creation, stock validation, inventory allocation, role-based permissions, payment records, and automated tests for account, voucher, and operational workflows.

CityCare Hospital Management System — GitHub
Java 21, Spring Boot, Spring Security, Spring Data JPA, Hibernate, Thymeleaf, MySQL, Bootstrap, Maven

- Built a hospital-management prototype with doctor and department directories, patient registration, appointments, appointment history, and an administrative dashboard.
- Integrated Spring Security, form validation, JPA-based database operations, appointment-status management, and administration of wards, rooms, and bed capacity.

The Royal Spice – Restaurant Ordering and POS System — GitHub
Python, Flask, Flask-SQLAlchemy, MySQL, Jinja2, Flask-Login, Flask-WTF, HTML, CSS, JavaScript

- Developed a restaurant ordering application with searchable menus, discounts, cart, checkout, receipts, reservation requests, staff administration, and point-of-sale (POS) functionality.
- Connected orders, customers, reservations, inventory, and sales and expense reports. Implemented authenticated forms, server-side price and discount validation, and capacity checks.

Hotel Booking System GitHub

PHP, MySQL, PDO, Bootstrap, JavaScript, SCSS

- Built a hotel-booking prototype with room browsing, room details, date selection, booking records, confirmations, and administration of rooms, amenities, and booking status.
- Used PDO and session-based workflows to manage database records and booking states. Payment is simulated rather than processed through a real payment gateway.

ZenBlog – Content Management System GitHub

PHP, MySQL, PDO, Bootstrap, JavaScript, CSS

- Developed a PHP/MySQL publishing platform with post creation and editing, categories, search, image uploads, author accounts, and an administrative dashboard.
- Implemented author-ownership checks, session management, comment moderation, and post publishing and unpublishing controls.

Certifications

- AWS Academy Graduate – Machine Learning for NLP
- AWS Academy Graduate – Machine Learning Foundations
- Neural Networks and Deep Learning – DeepLearning.AI
- Improving Deep Neural Networks – Optimization and Tuning
- Python for Everyone – Udemy
- Learn Java Programming – Udemy
- MS Excel Automation: Excel Data Analysis with Python – Udemy
- Data Analytics for Project Management – Udemy
- Foundations of User Experience (UX) Design – Google
- Start the UX Design Process – Google
- Professional UI/UX Design with Figma – UY LAB
- Microsoft Word Essential Training – Udemy

Additional Information

Languages: Bengali (Native), English (B2)
